

Premise[®] 200 SC

Direction for Use

Usage table

To protect wood from termite infestation.

Pest	Material	Recommended application rate Premise [®] 200 SC : water	Application method
Termites	Timber	13 ml : 10 L water	Spray or paint surface of dried timber or soak in mixture for 30 minutes.

To protect building foundation against termite attack.

Pest	Pre-construction	Recommended dilution rate Premise [®] 200 SC : water	Application method
Termites	Building foundation site Floor surface	13 - 25 ml : 10 L water	Spray solution onto foundation or below floor surface before installing floor slabs at 5 L / m ² or linear metre.
	Building foundation site Floor		Drill holes 50 cm apart along the wall, 15 cm away from wall. Pump into each hole 5 - 6 L of the solution.

** Use a higher dilution rate for longer protection. At a rate of 13 ml, Premise[®] 200 SC provides protection for 2 years and protection for 5 years at a rate of 25 ml.
