Description

Insecticide for the control of diamondback moth larvae (*Plutella xylostella*) on kales; Caterpillars (*Spodoptera exigua*) and Thrips on Roses; and False codling moth on Capsicum.

Mode of Action:

Match® 050 EC is a larvicide acting by inhibition of chitin biosynthesis, thus interfering with the formation of the cuticle. It is non-systemic but displays strong stomach and moderate contact activity. Match® 050 EC is effective on pests resistant to organophosphates and pyrethroids.

Spectrum of Activity:

Match® 050 EC is effective against leaf feeding lepidopterous and coleopterous larvae. It also exhibits ovicidal activity. It is active on larval stages of Western flower thrips (*Frankliniella occidentalis*).

Direction for use

Crop	Pest	Rate/100L water	PHI (Days)
Kales	Diamond-back moth	60-80ml. 60ml at low infestation and 80ml at high infestation	14
Capsicum	False codling moth	600 ml/ha	7
Roses	Caterpillars	60-80 ml. 60ml at low infestation and 80ml at high infestation	
	Thrips	2L/ha	

In a 20 litre knapsack sprayer use 25 ml (using 500 litres/ha water volume) and 40 ml using 300 L/ha water volume.

Pre-Harvest Interval: Kales: 14 days, Capsicum: 7 days.

Re-entry interval: 6 hours.

4

Mixing:

Add the measured quantity of concentrate to clean water in the half-filled spray tank. Maintain agitation while topping up. Always stir the spray mixture well and apply within a few hours. Prepare no more spray mixture than is needed for the immediate operation.

Application timing:

Start treatment when the economic threshold is reached and repeat as necessary.

Note: DO NOT overdose by overlapping applications or by exceeding the recommended rate.

Spray interval:

Observe a spray interval of 7-10 days. Use the shorter spray interval in cases of heavy pest infestation. Apply a maximum of 6 sprays per season, then rotate with products with a different mode of action, e.g., Pegasus® for diamond backmoth control.

Crop Tolerance:

When used as recommended Match® 050 EC is well tolerated by all crops it is recommended to be used on. In case of sensitive or new varieties, check crop tolerance first.

IPM-Fitness:

Monitor beneficials and pests and use local thresholds. If several treatments are required against the same pest, use alternate products with different modes of action. Match® 050 EC is safe to adult stages of predators. It is safe to predatory mites.

Application Information:

All equipment has to be properly calibrated before use with regard to forward speed, flow rate, to ensure thorough and even coverage of the whole plant, in particular also of the lower plant parts. Avoid spray drifts to non-target sites. DO NOT spray when wind speed is higher than 5 m/s. DO NOT spray during the hot hours of the day, or if foliage is wet or rain is imminent within 2 hours.

6

Ground application:

Match® 050 EC can be applied with tractor boom sprayers, knapsack sprayers or portable mistblowers. For vegetables planted in individual rows spray over the top to minimise soil contamination. Adjust the spray volume to the size the and volume of the crop, and do not spray over the run-off point. Keep your walking speed steady when using portable equipment. With portable mistblowers run the engine always at full speed for best droplet formation.

With tractorised mistblowers use hollow cone or flat fan nozzles equipped with respective filters at a pressure of 5-10 bars. With knapsack sprayers use hollow cone nozzles at a pressure of 2-5 bars.

Spray volumes

Tractorised mistblowers:	150-500 L/ha
Portable mistblowers:	50-150 L/ha
Knapsack sprayers:	300-500 L/ha

Protected crops in glasshouses and under plastic:

Match® 050 EC can be applied with spray guns, horizontal and vertical boom sprayers or knapsack sprayer. In view of the dense crops, care should be taken to achieve thorough coverage of all foliage especially the lower plant parts. Spray volumes between 500-1500 lt./ha are recommended.

Storage: Store away from sun and damp, in a cool dry place. Store in original tightly closed containers in a well-ventilated area. Avoid storage above 35°C or below -10°C. Store under lock and key, away from foodstuffs, drinking water, animal feeds, children, animals and unauthorised persons.

Hazards and Precautions

Precautionary measures

KEEP LOCKED UP OUT OF REACH OF CHILDREN and other unauthorised persons and animals.

8

Operator Safety: AVOID contact with concentrate or spray mixture on skin, eyes or clothing. DO NOT breathe spray mist. DO NOT eat, drink or smoke while handling the product, wash hands and face before doing so. If any disposition occurs, stop work, follow first aid measures, and call a physician.

WEAR protective clothing, i.e., for mixing / loading: impermeable gloves, face mask; for application wear overalls, hat or cap; facemask, gumboots and impermeable gloves. IF CONTAMINATION OCCURS with concentrate or spray mixture, immediately wash skin thoroughly, flush eyes several times with abundant fresh water, and remove contaminated clothing. AFTER USE, thoroughly clean protective clothing and wash entire body and change clothing. Wash contaminated clothing before re-use.

ENVIRONMENT AND WILDLIFE: TOXIC TO FISH and other aquatic organisms. DO NOT contaminate water used for irrigation or domestic purposes and water sources, such as ponds,

ditches, lakes, drainage systems, etc. Slightly toxic to bees. DO NOT spray when bees are actively foraging in the area.

Newly treated areas must not be grazed and all livestock is to be kept out; no food or feed should be collected from treated areas for a period corresponding to the pre-harvest interval.

Product and Container Disposal: Dilute surplus spray mixture with plenty of water and dispose off in a safe place away from water sources.

Triple rinse empty pesticide containers, crush, puncture holes and dispose off in accordance with National Legislation and Regulation. DO NOT re-use empty containers for any other purpose, especially not for food, feed or storing drinking water.

Leakage and Spillage: Remove heavily contaminated soil and dispose of in a safe place away from water sources.

Spillage: soak up with sand, sawdust, soil or an oil-binding agent. Collect all contaminated material and dispose of in

10.

a safe place or put in a waste bin or disposal bag, mark it and dispose of on a landfill site approved for pesticides.

Treat spill area with plenty of water.

FIRST AID INSTRUCTIONS:

SKIN CONTACT: Remove contaminated clothing and thoroughly wash the affected parts of the body with soap and water.

EYE CONTACT: Rinse eyes with clean water for several minutes.

If poisoning is suspected, stop work immediately and call a physician. Show label to the physician. If inhaled move to clean fresh air. If swallowed, repeatedly administer medicinal charcoal in plenty of water. Seek medical advice immediately.

Note: Never give anything orally to an unconscious person and never induce vomiting. If any indisposition occurs stop work immediately and call a physician.

TOXICOLOGICAL INFORMATION

Note to the doctor: In case of poisoning apply symptomatic therapy.

Inavyotanya kazi:

Wadudu huuwa mara tu wakila majani yaliyonyunizwa Match® 050 EC. Waduddu wanaokula majani (caterpillars) pamoja na wale wanaofayonza utomvu wa mimea (thrips) wote huuwa na Match® 050 EC. Wadudu wakila majani imenyunyizwa na Match® 050 EC huuwacha kukula majani na kufayonza utomvu ha hukufaa baada ya siku 3-4.

MAXIMUM PRINT AREA

Pendekezo la matumizi: 54mm x 51mm

Match® 050 EC inaweza kutumiwa kwa mimea ya sukuma wiki na waridi bila kuharibu mimea.

Match® 050 EC hutumiwa ikichanganywa na maji. Kwa matokeo mazuri zaidi nyunyiza Match® 050 EC mapema saa za asubuhi au saa za jioni.

14

Kiasi cha kutumia:

PAGES CAN BE ADDED OR REMOVED

Mimea	Wadudu	Kiasi/Lita 100 za maji	Siku za kusubiri kabla ya kuvuna
Sukuma wiki	Diamond-back moth	Millilita 60-80. Tumia millilita 60 uvamizi ukiwa chini na millilita 80 uvamizi ukiwa juu.	14
Pilipili hoho	False codling moth	Millilita 600/hekta	7
Waridi	Caterpillars	Millilita 60-80. Tumia millilita 60 uvamizi ukiwa chini na millilita 80 uvamizi ukiwa juu.	
	Thrips	Lita 2/hekta	

Ukiwa unatumia bomba la kubeba mgongoni (knapsack) tumia:

millilita 25 za Match® 050 EC kwa lita 20 za maji (ukitumia
lita 500 za maji).

PAGES CAN BE ADDED OR REMOVED
IN MULTIPLES OF 4 UP TO A MAXIMUM OF 20

Wakati wakungojea kabla ya kuvuna: Mboga: siku 14,
Pilipili hoho: siku 7.

Wakati wa kungojea kabla ya kuingia mahali pamenuy-
hyizwa dawa: masaa 6

Kuchanganya na maji:

Match® 050 EC ni lazima kuchanganya na maji kabla ya
kunyunyizwa. Kwanza weka kiasi cha maji safi kinachohita-
jika kwenye bombala kunyunyizia. Halafu ongeza kiasi cha
Match® 050 EC kinachopendekezwa na uchanganye dawa
na maji sawa sawa. Kila mara changanya dawa na maji
mara tu unapotaka kunyunyiza. Changanya tu kiasi cha
dawa kitakachowenza kutumiwa na kumalizika siku hiyo.

Wakati wa kunyunyiza:

Anza mara tu wadudu wanapoonekana na urudie kila wiki.

16.

Nyunyiza dawa wakati usio na juu kali. Saa za asubuhi au
jioni huwa nzuri.

PAGES CAN BE ADDED OR REMOVED
IN MULTIPLES OF 4 UP TO A MAXIMUM OF 20

Fanya minyunyizo 2-3 kwa msimu. Anza ukiona watoto wa
wadudu 0.5 kwa njani moja ya mboga.

Ikiwa una nyunyiza kwa kuua thrips nyunyiza mara mbili
kwa vipindi ya siku 4-5.

Kiasi cha maji:

Kiasi cha maji kinategemea aina na ukumbwa wa mime:
Mboga za aina mbali mbali: lita 150-500 kwa hekta.

MAXIMUM PAPER AREA
54mm x 51mm

Ukinzani:

Inapendekezwa kufuatana minyunyizo ya Match® 050 EC
na ya Pegasus® wakati unanyunyiza kuzuia wadudu wa
aina ya caterpillars kama Diamon backmoth.

Kuhifadhi: Hifadhi mahali pakavu mbali na vyakula, watoto
na mifugo. Chumba chenye dawa kiwe kikavu na chenye
hewa ya kutosha na daima kiwe kimefungwa.

Hadhari: WEKA MBALI NA WATOTO, mifugo na watu wa siohusika nayo.

PAGES CAN BE ADDED OR REMOVED

IN MULTIPLES OF 4 UP TO A MAXIMUM OF 20

Usalama kwa wanyunyizaji:

Usinywe, usile wala usivute sigara unapotumia Match® 050 EO ha kabla ya kufanya hivyo oga mikono na uso. Usivute hewa yenye dawa. Vaa nguo za kazi, yaani ovaroli, glavu, buti, kofia, ngao la sura, hasa wakati wa kukoroga na kunyunyiza dawa. Ukimwagikiwa na dawa mwilini au nguoni, osha mara moja kwa maji safi na sabuni. Baada ya kazi oga mwili wote. Safisha nguo za kazi kabla ya kuzitumia tena.

MAZINGIRA NA WANYAMA WA PORI:

Match® 050 EC hudhuru nyuki na samaki. Usinyunyize wakati nyuki wanaruka kutavuta chakula. Usimwage dawa ovyo ovyo mtoni au kwenye kisima. Match® 050 EC hai-hudhuru ndege. Wanyama wote wasikubaliwe kuingia mahali Match® 050 EC imenyunyizwa na usiokote au kuvuna chakula yoyote ya mifugo mahali imenyunyizwa dawa.

18.

Dawa imalizikapo:

Dawa ikisalia itupwe mahali maalum lilitotengenezwa kwa kazi hiyo. Viwekeo vyote vitupu visuuze mara tatu kwa maji safi kisha viharibiwe kabisa kabla ya kutupwa kulingana na Sheria na Kanuni za nchi za utupaji. Viwekeo vikiisha dawa visitumike kwa shughuli yoyote, hasa kuweka vyakula ama maji ya kunywa.

Kumwagika na kuvuja dawa: Udongo uliomwagikiwa dawa uchotwe vizuri na utupwe mahali salama mbali na vianzio au njia za maji. Kusanya dawa iliyomwagika kisha weka kwenye mfuko wa taka na utupe sehemu iliyi mbali na vianzio vya maji. Iioshe sehemu iliyomwagikia dawa kwa maji mengi.

Zingatio: Dawa iliyomwagika isitumike tena.

HUDUMA YA KWANZA:

Kama ukijisikia umesumika, acha kazi na uone daktari mara moja. Mgonjwa awekwe mahali penye hewa ya kutosha, mbali na dawa. Kama dawa imekumwagikia, toa nguo na zivuliwe vizuri na uoshe sehemu iliyi na dawa kwa maji safi na sabuni. **Ikiwa dawa imeingia kwenye macho**, yasa-
