

Cost effective weed management

KICK-OUT[®] 480SL

Systemic & Non-selective Herbicide

Guarantee: **Glyphosate 480g/L** | Classification: **Isopropylamine salt** | Formulation: **Soluble Liquid** | WHO CLASS: **IV**

General Description: KICK-OUT is a systemic and non-selective herbicide for the control of a wide variety of annual, biennial and perennial grasses, sedges, broad leaved weeds and woody shrubs. KICK-OUT is a post emergence herbicide with the combined properties of high unit activity and wide spectrum of control.

mode Of Action: KICK-OUT is a post-emergence systemic herbicide absorbed through the foliage and translocated rapidly from aerial parts to underground roots, stolons, tubers or rhizomes of perennial weeds. Control of annual weeds begins as soon as the chemical penetrates the tissues. Leaf symptoms appear within 7 to 14 days after application and complete desiccation usually within 30 days. The product is inactivated on contact with soil.

Recommended Application Rates

Weeds	RATES (L/Ha)	RATES IN 20 L WATER
Grasses and broad leaved weeds in reduced tillage systems (Apply KICKOUT at least one week before planting)	2.0 - 2.5	200 - 400ml

Other Suggested Uses

Crop	Weeds
Fruit orchards, plantation crops e.g. (bananas, coffee, etc.), tea, sugar cane, ornamental trees and shrubs in forestry.	Broad leaved weeds and grasses
Maize: This products should be used for zero/minimum tillage, at least one (1) week before planting maize.	

Compatibility: Incompatible with alkaline materials, anionic surfactants and clay-containing inert materials.

Environment: Paraquat is rapidly degraded in soil where it is strongly bound and inactivated by soil and aquatic sediments and does not leach into ground water.
