### TWIGALICK DRY COW

#### CATEGORY 2 - Dry Dairy Cows

A specially constituted mineral supplement fed to dry dairy cows 2 months before calving to:

- Reduce incidence of retained placenta, uterine infections and mastitis due to its high level of selenium.
- Reduce incidence of milk fever.
- Improve the general health and performance of new born calves.
- Enhance milk production.

#### COMPOSITION

Calcium	5%	Iodine	588ppm
Phosphorus	8%	Cobalt	120ppm
Sodium Chloride	30%	Selenium	32.2ppm
Magnesium	12.44%		
Zinc	6562ppm		
Manganese	4502ppm		
Copper	2344ppm		

#### Feeding recommendations
